

Darwino Partner Enablement Workshop

November 28-30,
2016

*Enabling Developers
for the modernization
challenge*

Great Opportunities lies ahead – let's continue to lay the foundation together!

Darwino is the only complete write-once, deploy-everywhere technology-agnostic development platform for the modernization of legacy and development of new Enterprise Applications. Especially with its high-fidelity Domino Connector it can dramatically assist in the modernization of Lotus Notes / Domino Applications but is not limited to those.

Workshop Outline

The purpose of the workshop is to get a deeper understanding of the Architecture of Darwino and its application when modernizing or developing existing or new applications

Agenda:

Day 1 & 2: Darwino Architecture and Concepts, Phil Riand & Jesse Gallagher, Darwino
Concepts that we will cover are the installation process, DarwinoDB as the JSON store, data model, mobile/ offline, the domino connector, etc.

Day 3 - optional: Hands-on work. Participants can start developing their applications and get immediate help from the Darwino team.

*Partners are key –
learn jointly with and
from each other*

We also want to build in slots for the partners to show already developed solutions and tools that can help with development projects and introduce you to the Open Source activities around Darwino presented by Christian Guedemann of OpenNTF / Webgate.

Registration & Location

Darwino partners are invited to register for the **Darwino Partner Enablement Workshop** at the rate for a contribution towards expenses of €500,00 per company and up to 2 attendees. The workshop fee includes a Darwino annual subscription license for the commercial use of one internal application.

Registration

Please register by email at: info@darwino.com and include your billing address.

Location

The meeting will take place at the IBM facility in Cologne, Gustav-Heinemann-Ufer 120-122, 50968 Cologne, Germany.

We don't have special rates at hotels near the facility but here are a few suggestions: Novotel Köln City, NH Köln Altstadt, Atrium Rheinhotel
